

STAFF AUGMENTATION / HEALTHCARE

From a first requirement to a growing onsite team

How Techno Tackle became a dedicated onsite staffing partner for a leading super speciality hospital in Coimbatore — placing five software professionals since March 2025, and upskilling the hospital's in-house team of four .NET developers to the MERN stack.

CLIENT ACCOLADE

In the client's own words

“ We have been associated with Techno Tackle for IT staff augmentation and other solutions. As development activities came up in the hospital, we were looking for outsourced development. We did not want to hire a complete in-house team to build an entire application and maintain it long term. So we preferred Techno Tackle for IT staff augmentation. They have given good resources, and they align with our company protocols. We are really happy to have staff from Techno Tackle.

ABOUT THE CLIENT

Ganga Hospital

Ganga Hospital is a leading super speciality healthcare institution based in Coimbatore, Tamil Nadu. Established in 1978, the hospital is internationally recognised for its expertise in Orthopaedics, Plastic Surgery, Trauma Care, Spine Surgery, Hand Surgery and Microsurgery.

The hospital is equipped with advanced healthcare infrastructure and a team of highly experienced medical professionals. Alongside clinical services, it is actively involved in medical education, research and innovation, serving patients from across India and around the world.

PATIENT BASE

THE REQUIREMENT

Engineering capacity, at short notice

WHY STAFF AUGMENTATION

Ganga Hospital opted for the staff augmentation model to quickly access experienced software professionals who could support its internal software systems and ongoing digital initiatives.

Traditional hiring methods were not always suitable for meeting immediate project demands.

REQUIREMENT → **ONSITE
RESOURCE**

WHAT THE CLIENT NEEDED

- ✓ Skilled developers and designers with specific technology expertise.
- ✓ The ability to scale engineering teams rapidly in line with project demand.
- ✓ Immediately deployable resources for ongoing internal software systems.
- ✓ Professionals who integrate seamlessly with existing engineering teams.

BENEFITS TO THE CLIENT

Faster resource onboarding

Shortlisted profiles in under three working days.

Flexible team scaling

Resource levels adjusted as project needs changed.

Specialised expertise

UI/UX, MERN, Angular, Python and Flutter.

Reduced recruitment effort

Sourcing, screening and coordination handled by us.

OUR APPROACH IN ACTION

A structured path from brief to deployment

We combined our in-house talent pool with a nationwide vendor network of more than 100 partners, so the client received technically screened professionals aligned to their requirements. For one senior lead position, the deployed profile was sourced through that vendor network.

01

Understanding client needs

We worked closely with the client to understand the job description, technical requirements and project expectations before starting resource selection.

02

Identifying the right talent

We evaluated our in-house pool first, then drew on our nationwide vendor network. Every candidate passed internal technical screening before being shared.

03

Fast resource deployment

Shortlisted profiles were submitted in under three working days. Once approved, resources onboarded immediately or to the client's schedule.

04

Ongoing support

A single dedicated point of contact coordinated with the client, monitored resource performance and gathered regular feedback throughout the engagement.

Under 3 working days

to shortlisted profiles

Internal screening

before every submission

One point of contact

for the full engagement

Every profile shared with Ganga Hospital followed this same four-step path.

RESOURCES DEPLOYED

Specialist developers, working onsite

Techno Tackle provided skilled software professionals through its dedicated staff augmentation model to support Ganga Hospital's internal software development initiatives. Resources were selected against the client's technical requirements and deployed within a short turnaround time.

ROLES SUPPORTED

- **Technical Trainer**
- **UI/UX Designers**
- **MERN Stack Developers**
- **Angular & Python Developers**
- **Flutter Developers**

ENGAGEMENT TYPE

Fully onsite

Resources work directly from Ganga Hospital's Coimbatore office. Not remote, not hybrid.

DEPLOYMENT MODEL

Dedicated resources

Onsite dedicated staff augmentation, aligned to the client's own project schedule.

SOURCING

In-house pool & vendor network

One senior lead position was filled through our vendor network; the remainder from our own team.

TECHNOLOGY EXPERTISE

- UI/UX Design
- MERN Stack
- Angular
- Python
- Flutter

INTEGRATED, NOT OUTSOURCED

Each resource works exclusively within the client's team — not shared across accounts.

PARTNERSHIP IMPACT

A partnership that kept growing

Since 2025 we have supported Ganga Hospital through a dedicated staff augmentation engagement. Our continued partnership reflects the client's confidence in our ability to provide skilled professionals aligned to its evolving technology requirements.

Jun 2025

Second dedicated resource
deployed onsite

Aug 2026

Engagement expanded — four
dedicated resources onsite

- ✓ Two resources deployed in March 2025 and June 2025 continue to support the hospital's internal software development initiatives.
- ✓ The engagement was expanded with a Flutter Developer and a dedicated UI/UX Designer to support a hospital mobile application.
- ✓ Two UI/UX Designers have been deployed in total — when one designer's engagement ended, a replacement maintained continuity.

TECHNICAL TRAINING & UPSKILLING

Upskilling the client's own IT team

Ganga Hospital already runs its own in-house IT team of four .NET developers. Techno Tackle upskilled that team for MERN Stack development: our Senior Technical Trainer delivered a four-month MERN Stack Skill Upgradation Programme to all four.

RETENTION & REFERRAL

Why the engagement kept growing

Ganga Hospital has hired multiple professionals through Techno Tackle over the course of the engagement, and has referred us to two new clients. Both are the clearest signals a staffing partner can be given.

Repeat hiring

The hospital has returned to us with new requirements at multiple points, rather than treating the engagement as a one-off placement. Five professionals deployed in total.

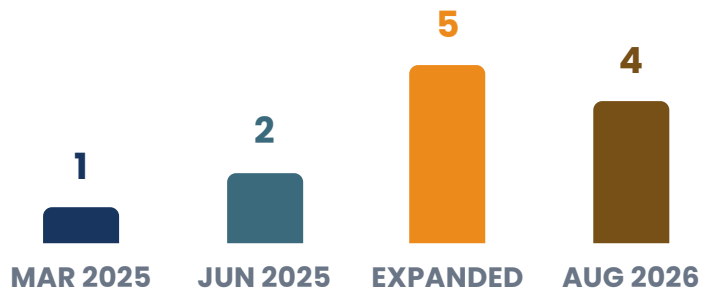

Continuity through change

When one designer's engagement ended, a replacement was deployed so the design work continued. Two UI/UX Designers deployed to date.

Expansion into new technologies

The engagement widened from web development into mobile and design, adding a Flutter Developer and a UI/UX Designer.
