THE CLIENT

About South West Port

South West Port Limited (SWPL) is a port company within JSW Infrastructure Limited, the ports and maritime logistics arm of the JSW Group. It provides cargo handling and logistics support to JSW Group manufacturing operations, including JSW Steel.

The wider JSW Group is one of India's largest diversified conglomerates, with interests spanning steel, energy, cement, infrastructure, paints and mobility.

handled

Techno Tackle's resources work onsite at the client's Ennore, Chennai office.

JSW Infrastructure figures as published on [jsw.in](https://www.jsw.in), August 2026.

How the Engagement Began

01 April 2026

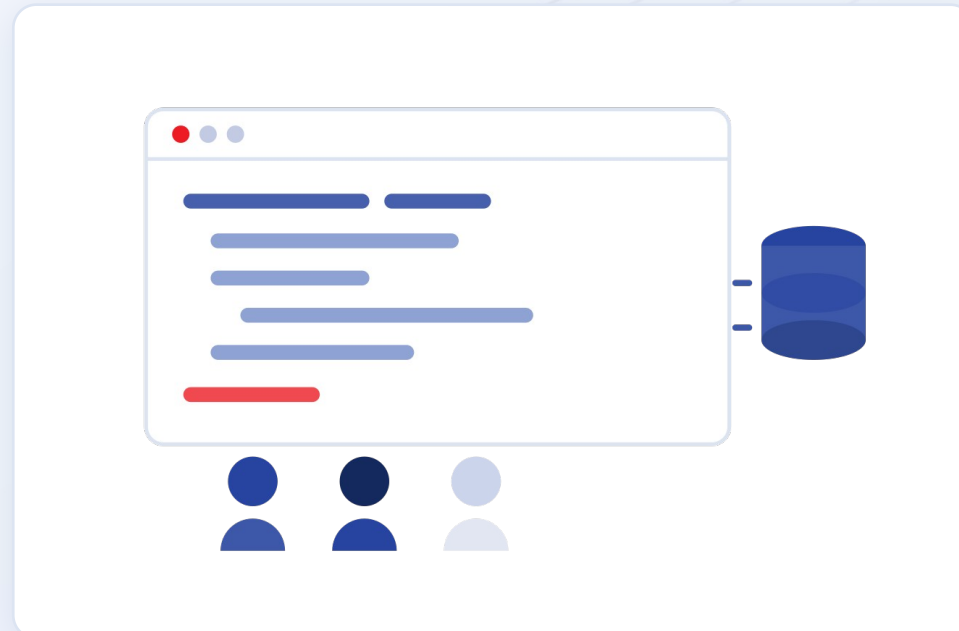

The client's IT team approached Techno Tackle for contract technical resources to support an in-house application.

02 The requirement

PHP full stack developers able to integrate with the existing team and own delivery and support from the start.

03 May 2026

The engagement commenced, with two developers deployed onsite at the client's Ennore, Chennai office.

Two developers embedded within the client's IT and project teams.

THE REQUIREMENT

What the Client Needed

Specialised expertise

PHP full stack developers with MVC framework, MySQL and REST API experience.

Application development

New features and modules, customisation of existing functionality, performance tuning.

Ongoing support

Day-to-day technical support, defect resolution and root cause analysis.

Onsite integration

Working directly within the client's IT and project teams at Ennore, Chennai.

Flexible engagement

Capacity engaged for the duration the project required, without permanent headcount.

Engaged for 18 months

A purchase order covering the full project horizon, not a short-term fill.

Why Staff Augmentation

Dependable development capacity for a defined phase of work, without the lead time of permanent hiring.

Precision-matched capability

Developers with hands-on PHP, MySQL and frontend experience suited to the application.

Capacity that scales

Resources engaged for the period the project requires, with room to adjust as scope evolves.

Lower recruitment overhead

The client's hiring managers saw only evaluated, job-ready profiles.

Integration, not outsourcing

Developers work within the client's teams, to its own standards and reporting lines.

Our Engagement Delivery Framework

How Techno Tackle sources, screens and supports resources on every staff augmentation account.

01

Requirement alignment

We worked with the client's IT team to understand the application, its stack and the two-resource requirement.

02

Technical screening

Every candidate submitted was assessed against the required skill set before reaching the client.

03

Rapid profile submission

Shortlisted, screened profiles are submitted within 3 business days of a requirement.

04

Continuous account support

A named point of contact tracks performance and supports the account through its review points.

Resources are sourced through Techno Tackle's in-house talent pool and nationwide vendor partner network, with internal technical screening applied before any profile reaches a client.

Technologies and Resources Provided

Roles

- PHP full stack developers
- 4+ years experience
- 2 positions, both filled

Technology stack

PHP

MVC frameworks

MySQL

RDBMS

HTML

CSS

Bootstrap

JavaScript

AJAX

jQuery

JSON

REST APIs

Functional areas

- Application development and enhancement
- Performance tuning
- Support and defect resolution
- Database and backend activities
- Frontend and UI support

Deployment model. Each resource is engaged solely for this requirement, working within the client's existing IT and project teams.

STATUS, AUGUST 2026

Where the Engagement Stands

- ✓ Both PHP full stack developer positions filled and active onsite.
- ✓ Engaged under an 18-month purchase order, running since May 2026.
- ✓ Continuous development, enhancement and support coverage.
- ✓ Resources working to the client's SDLC, coding and security standards.

GOVERNANCE

How the engagement is governed

Direct reporting line

Resources report to the client's project manager and technical lead.

Structured performance review

Quality of deliverables, timelines and responsiveness.

Single point of contact

A named Techno Tackle contact stays engaged throughout.

Why Techno Tackle

Eleven years of building software and supplying technology talent to Indian and global clients.

Deep talent access

In-house talent pool plus a trusted nationwide vendor partner network.

Rigorous screening

Internal technical assessment before every submission.

Dedicated support

A named point of contact for the full engagement.

Flexible scaling

Resource levels adjust as project needs evolve.

Broad expertise

Frontend, backend, mobile, cloud, QA and DevOps.

Independently rated

Verified client reviews across engagements.
